

SES Residential Programs for Natural Gas

Nicor Gas Customers - Customer Select

What is SES Select?

The Customer Select program allows smaller volume consumers to choose a natural gas supplier other than Nicor Gas for Commercial, Industrial and Residential accounts.

2002 is a big year for all Illinois natural gas customers that purchase through a public utility company. The residential market is deregulating in March 2002 for all Nicor Gas Customers. Nicor Gas will mail out educational materials from February 13, 2002 through March 27, 2002 to customers in the Nicor Gas Territory.

The educational packet distributed by Nicor Gas will have step-by-step instructions on how to sign up, along with a record of your gas usage over the past 12 months.

By switching to SES, you have an opportunity to save money. After switching, Nicor Gas will continue to read the meters and maintain the pipeline system. The only difference is that you buy your gas from SES.
